PROFESSIONAL SUMMARY

Gen AI engineer with 2+ years building and shipping production LLM applications on Azure for enterprise healthcare (CVS Health). Experienced across RAG systems, agentic AI workflows, and embedding LLM features into large-scale production applications, with full-stack delivery in Python and .NET. Anthropic Claude Certified Architect and Microsoft Certified Azure AI Engineer, backed by an IIT Madras Diploma in Programming.

TECHNICAL SKILLS

Gen AI & LLM: RAG (chunking, hybrid search, reranking, citations), agentic AI (ReAct, multi-agent, MCP), prompt engineering, embeddings & vector search, LLM evaluation

AI Platforms & Tooling: Azure OpenAI, Claude (API, Agent SDK, Claude Code), GPT-4/5, Google Vertex AI, LangChain / LangGraph, Hugging Face, Ollama

Languages: Python, C#, SQL, JavaScript, Java

Backend & Web: FastAPI, Flask, ASP.NET MVC / Web API, React, Angular

Cloud & Data: Azure App Service, Azure AI Search, Azure Service Bus, Cosmos DB, SQL Server, Key Vault / Service Principal

DevOps & Testing: Git, GitHub Actions, TeamCity, Octopus Deploy, PyTest, NUnit, Snyk, Playwright

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions Chennai

Oct 2024 – Present

Gen AI Developer | .NET Developer

- Build and ship Generative AI and agentic PoCs (Azure OpenAI, Python, React) for an enterprise healthcare platform serving CVS Health, driving features from prototype to production.
- Designed RAG pipelines with Azure AI Search and vector embeddings enabling semantic retrieval across 10L+ enterprise documents with grounded, cited responses.
- Embedded LLM-powered features — document understanding, conversational workflows, automated reporting — into a production .NET MVC application without disrupting core architecture.
- Deployed Python AI services to Azure App Service with a Cosmos DB backend; managed secrets and identity via Key Vault / Service Principal.
- Owned CI/CD for AI features across Git, TeamCity, GitHub Actions, and Octopus Deploy; hardened code with NUnit tests and Snyk vulnerability remediation.

NEC Corporation India Chennai

Apr 2024 – Oct 2024

Automation Quality Analyst — Apprentice

- Transitioned from QA to development in 3 months, shipping .NET API endpoints and JavaScript features for the Bausch & Lomb client.
- Built Power BI dashboards used by business teams for data-driven decisions.
- Wrote Python automation that reduced manual QA effort across test cycles.

KEY PROJECTS

SDLC Agentic Workflow Tool — Claude Code · Python · Playwright · JIRA API · SQLite

- Co-building (2-engineer team, full ownership) an agentic tool for an enterprise client that automates the software delivery lifecycle — Analyse, Implementation, and QA agents orchestrated via Claude Code over a per-repo knowledge layer, with debugger/reviewer subagents, human approval at each stage, and a Playwright QA agent that auto-loops failing tests back into analysis until all pass.

Contract Keyword Search Engine — Azure OpenAI · Azure AI Search · RAG · App Service

- Semantic search engine indexing and querying 10L+ enterprise documents with vector retrieval; RAG architecture on Azure App Service for fast retrieval of specific legal clauses and contract keywords.

Contract PDF Comparison Tool — Azure OpenAI · Azure Service Bus · Chunking · GPT-4

- AI document analyzer automating side-by-side comparison of complex contracts; Azure Service Bus async queuing for reliable large-file processing under peak load.

CERTIFICATIONS

Claude Certified Architect – Foundations — Anthropic ([verify](#))

Microsoft Certified: Azure AI Engineer Associate (AI-102) ([verify](#))

Microsoft Certified: Azure AI Fundamentals (AI-900) ([verify](#)) · **Microsoft Certified: Azure Fundamentals** (AZ-900) ([verify](#))

EDUCATION

Diploma in Programming — IIT Madras (Online)

2025

B.Tech, Computer Science & Engineering — Dr. MGR Educational & Research Institute

2024
